BUSINESS CONTEXT

Decentralized business and therefore decentralized work is the future.

Most regular real-world companies do not understand distributed ledger technology (DLT) or the implications for their business models yet. Within the next years they will start to discover and integrate DLT into their processes and WE will be ready for that huge market demand - as experienced and reliable developer, consultants and business partners.

OUR MISSION

We build a Decentralized Autonomous Organization (DAO) with real-world companies (LLCs) for DLT freelancer.

It is our mission to create an international hybrid business ecosystem for distributed ledger technology developer and consultants to cooperate freely and profitably with clients and companies.

WHAT MAKES US DIFFERENT?

We cooperate and share profits as a community.

Instead of making a single person extremely rich, we cooperate and share profits as a decentralized community. The DLT Hero Hybrid Ecosystem is based on digital and fiat assets and combines the intelligence of a decentralized autonomous organization with the efficiency and legal framework of limited liability companies in different countries. Especially shares & stocks will allow DLT experts from token restricted jurisdictions to participate in the success of the hybrid ecosystem.

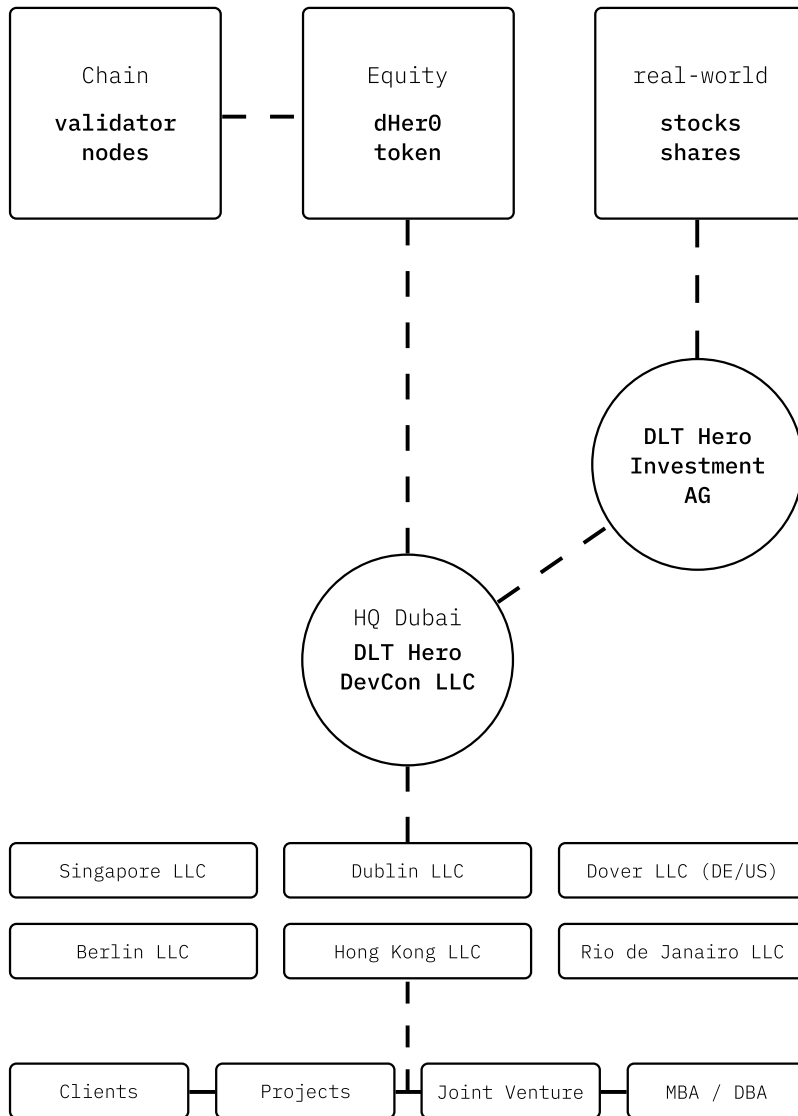

HOW TO JOIN?

There are different ways to be part of this story.

People can be part of the ecosystem by holding, staking and trading dHer0 token. They can also be accredited DLT Hero Validators, earning passive income, or work as DLT freelancer.

LEGAL FRAMEWORK

We use token, shares/stocks, create different community pools and distribute profits directly through smart contracts and conventionally through different public and private limited liability companies (LLC, Ltd, GmbH, Public Shareholder Company and Aktiengesellschaft).

Simplified illustration

PART 2
dHer0 TOKENOMICS

DNA dHer0

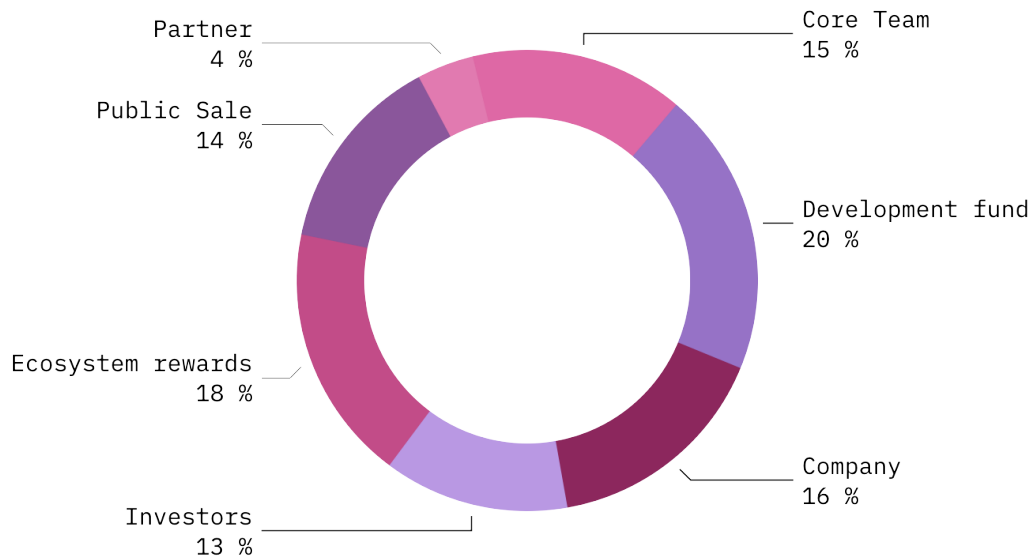

Stake, farm, trade & vote

dHer0, the native entry token to our DLT Hero Hybrid Ecosystem.

Name	dHer0
Ticker	DHEZ
Type	BEP20
Issuer	DLT Hero DAO / LLC
Total supply	11,000,000
Fully diluted market cap (estimated Q3'23)	99,000,000
Decimals	18 (1 TKN === 10^{18} TKNbits)
Price	Function of demand
Vest	Trigger-based (mainnet launch & TGE IDO) Time-based (cliff lockup)
Cliff Lockup	Complying with Rule 144 safe harbor framework (resale of unregistered securities); 12 month lockup for unaffiliated token holder
KYC	Yes (WhitelistCrowdsale)
Mechanics	Deflationary Burn on transaction (burning fee) Public buy-back and burn
Emission	Transfer of ownership > Private distribution > Private sale > Public sale
Auditor	Smart contract development in progress

ALLOCATION, VESTING & LOCKUP

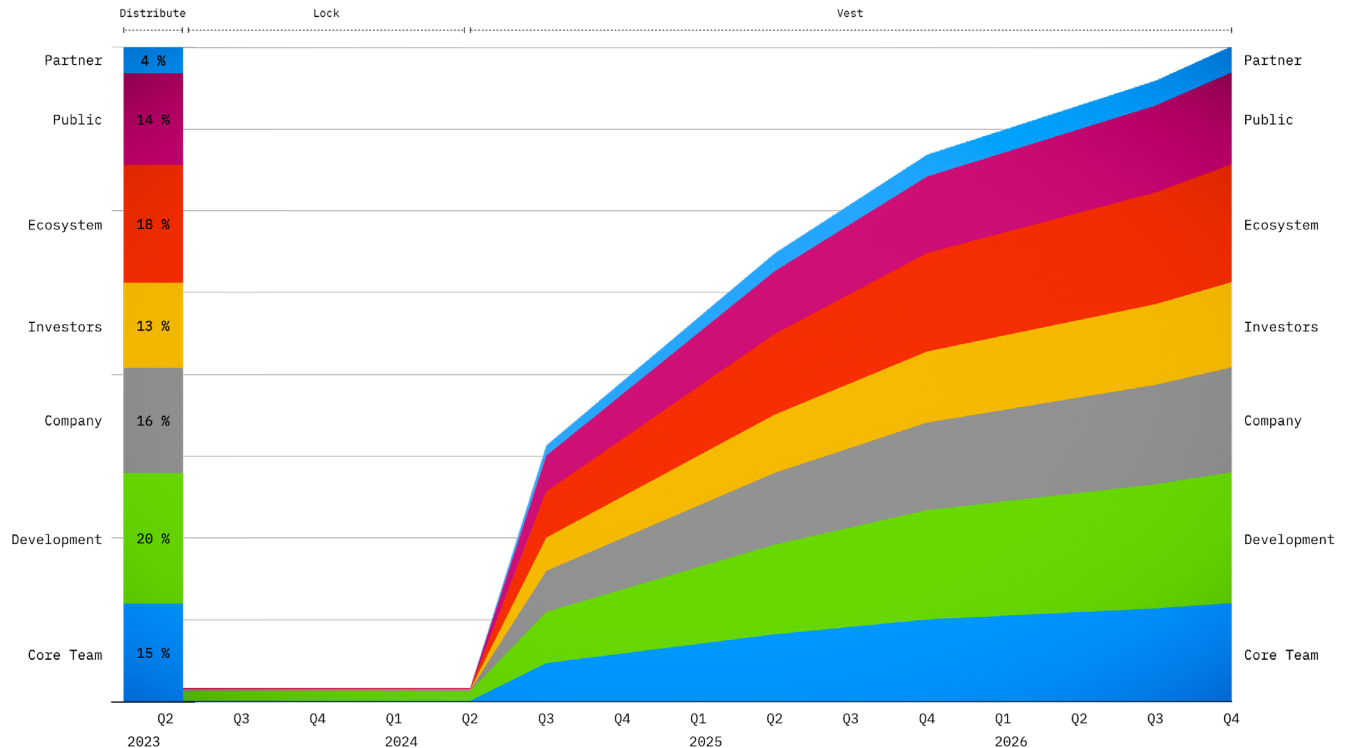

11 million token will be minted and unlocked in different stages over a period of four years to prevent oversupply shocks. Unlocked token will be available to the recipient for staking and farming.

		Total
Core team	15%	1,650,000
Development fund	20%	2,200,000
Company fund	16%	1,760,000
Investors	13%	1,430,000
Ecosystem rewards	18%	1,980,000
Public sale	14%	1,540,000
Partner	4%	440,000
	100%	11,000,000

*TVU: Total Value Unlocked

Cliffs, vesting schedules and lockups are important to prevent early sell-offs that can harm the functionality and viability of the ecosystem. It prevents core team members, developers or early backers from prematurely selling their tokens and dumping on the community. Generally we are complying with Rule 144 for a safe harbor framework.

Unlocking and block-by-block vesting of dHer0 for stakeholder groups over a period of time. A study by Lauren Stephanian implies that "larger initial unlocks have less negative price impact than smaller initial unlocks".

Use this benchmark button to compare our metrics to other projects (opens a website).

BENCHMARK

MECHANICS

A build-in burning fee will be used to support the deflationary nature of the token. Additional deflationary mechanisms including but not limited to other forms of token burns will be conducted where appropriate and possible.

FARMING

dHer0 can be used to farm Hero Validator Node Fragments (HVNF). These fragments can be used to buy a Hero Validator Node.

PART 3
BUSINESS ACTIVITES

DLT HERO FREELANCE PLATFORM

The community offers DLT freelance services as direct P2P web3 & token based services including community pools, voting, level up logic and internal guild systems. For real-world business contracts with client companies the community operates through different LLCs and fiat payments.

DLT HERO JOINT VENTURE

As a community we will invest in promising DLT startups and companies. Either based on token concepts or on regular fiat shareholder investments through our LLCs but only if our community was substantially involved in the development of the startup ecosystem. We will not invest in unrelated companies or systems just to make profits.

DLT HERO MBA AND DBA

Through our DLT Hero Academy LLCs we will develop and offer certified DLT MBA and DBA programs. We will cooperate with universities and institutions in Europe, Asia and America and operate four connected LLCs in these areas. Curricula are based on industry standards and different legal frameworks. We will offer MBA for DLT Business, ICT, Law, Controlling, Security and Usability Design. Everything build on Web3, dApps, minted certificates and P2P learning. Students signing up with our DLT Hero Academy in Dubai can pay all fees in crypto.

DLT HERO RESEARCH

We will invest through our science pool into developing a proper scientific framework for DLT business with a strong focus on business smart contracts. We will support and finance white paper, thesis and research projects.

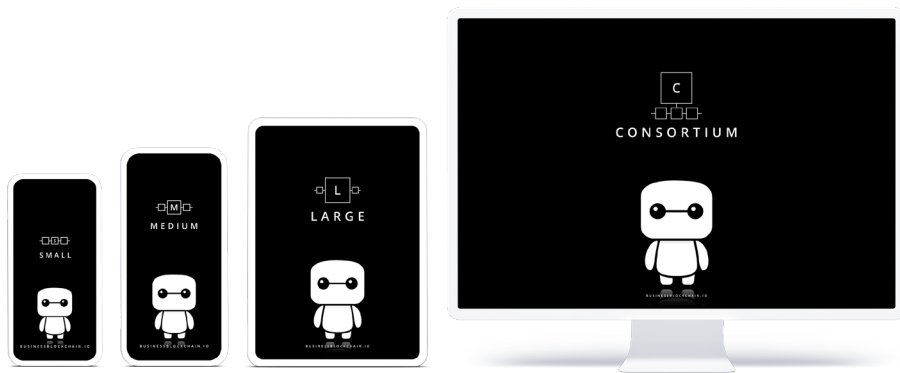

ECOSYSTEM PROFIT SOURCES

There are many different ways to gain profits within the ecosystem. We show here a very simplified overview for conceptual sources and the allocation of profits.

<i>Type</i>	<i>Source</i>	<i>Concept</i>
Decentralized profit share	DLT Hero Community Profit Pool Hero Freelance Web3 platform Hero Validator Node Fee Pool	Stake for profit Buyback Farm Node Fragments (Burning events)
Centralized bridges for decentralized profit share	LLCs through Hero Holding LLC Hero Development & Consulting Hero Joint Venture Hero Academy MBA & DBA	Stake for profit Partial equity
Old school profit share	Shares & stocks Public Shareholder Company (AG) (Only available for DLT Hero Freelancer with an experience higher than level 30)	Fiat dividends Stock dividends
Decentralized	Affiliate Onboarding of new freelancer Sell Hero Validator Nodes	Commission
Decentralized and centralized profits	Sales teams Freelance sales teams sell projects	Commission
Decentralized and centralized profits	Projects & Guilds Found a guild (Guild Master) Manage a guild (Guild Leader & Council) Guild pool distribution Finish freelance projects	Hooked smart contracts Fiat bridge Crypto and fiat payment

HERO VALIDATOR NODES

Hero Validator Nodes (HVN) are part of the Hades Business Blockchain Ecosystem (a platform for business smart contracts that offers 'Blockchain as a Service' (BaaS)) and are based on proof of involvement. They are available in sizes Small, Medium, Large and Consortium for private entities and companies. Payouts are on a daily, weekly or monthly basis. Private Validator Nodes payout in crypto only, Enterprise Validator Nodes payout in crypto or fiat (based on monthly invoices). The Large and Consortium Validator Nodes have voting rights. HVN can be bought with BUSD, USDT, USDX, USDC, dHer0 and Hero Validator Node Fragments (HVNf).

	PRIVATE			Enterprise		
	Small	Medium	Large	Small	Medium	Large
Payout factor	1	5,5	12	E1	E5,5	E12
Payout interval	Monthly	Weekly	Daily	Monthly		
Payout form	Crypto			Crypto or Fiat		
Payout to	Wallet			Wallet or Bank Account		
Fiat invoice	No			Yes		
Written Contract	Smart Contract			SC & IRL Contract		
Voting rights	No	No	Yes	Yes		
Valid for	7 years			7 years		
Age brings profit	Yes			Yes		
Auctionable	Yes			Yes		
Inheritable	Yes			Yes		
USDT (at launch)	3,200	16,000	32,000	35,200	176,000	352,000
USD (at launch)	-	-	-	42,240	211,200	424,000

PART 4
FREELANCER WEB3 COMMUNITY

DLT FREELANCER WEB3 BUSINESS PLATFORM

A worldwide Web3 platform where freelancer can work alone or in flexible teams directly for clients. Payment is in crypto. Everything is automatically send per smart contracts to your wallet and to community pools. No more hassle with fiat money, authority control or fraud. And every real-world project gives our freelancer experience points to level up within our ecosystem... pretty much like in a game but with real value.

Clients can use four different wallets to connect to our Web3 freelancer platform. DLT Hero Freelancer use a special KYC GIG Wallet to interact with clients directly. No more passwords and stupid 'I'm not a robot' checks anymore. Safe, fast and secure.

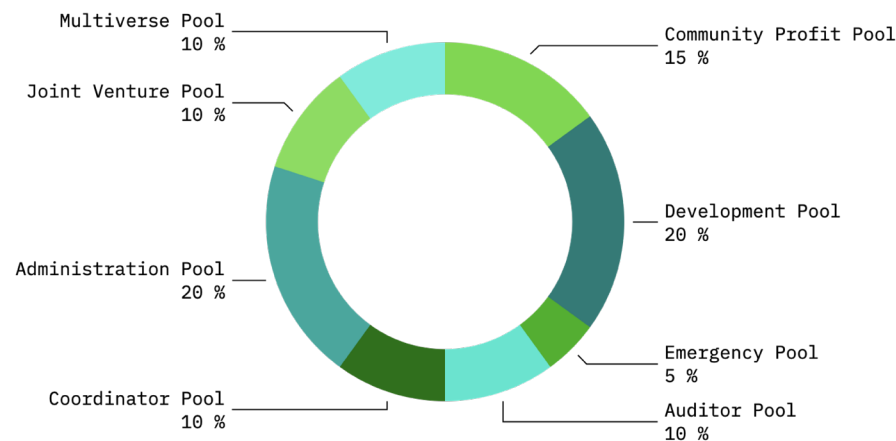

Automatic pool distribution with voting rights.

* The number 6,233 (active freelancer) is for illustration purposes only and does NOT reflect the actual number of active DLT Hero freelancer. We are a startup community and we will have to build this community first.

COMMUNITY POOL SYSTEM

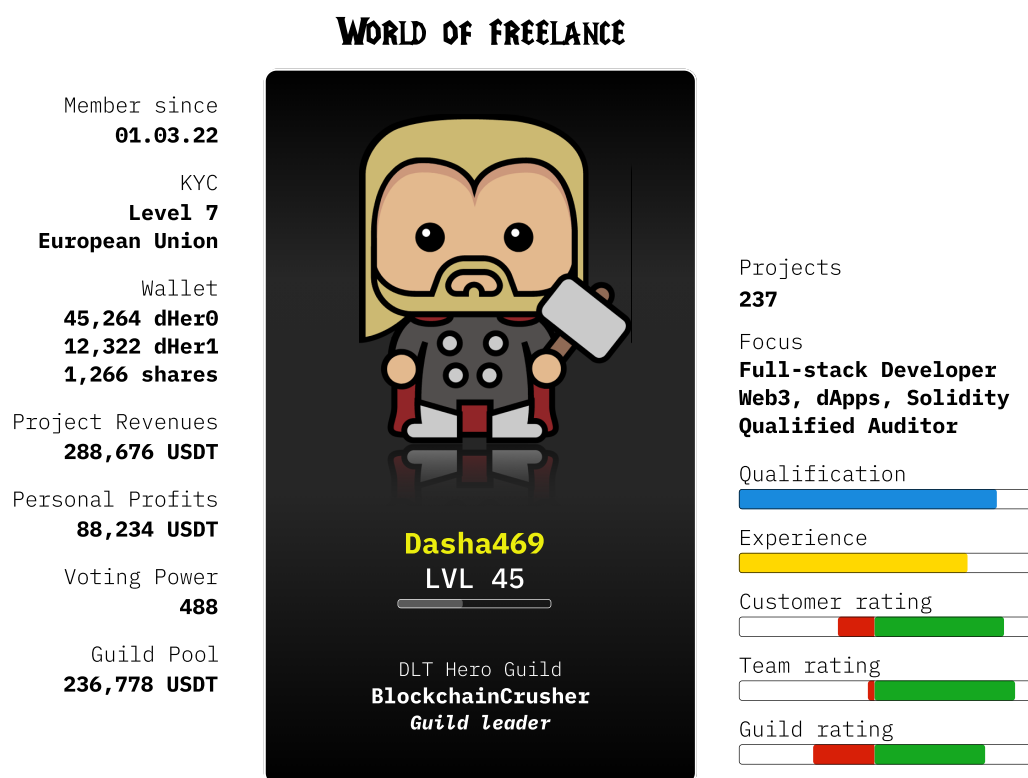

Every DLT project fulfilled by a DLT Hero Freelancer contributes through smart contracts automatically to different community pools. We use community pools to develop our ecosystem and keep our output quality high and community assets safe.

The real-world usage of the different pools and the assets within is subject to community votings. Especially the allocation of the **Joint Venture Pool** will be a strong focus for the community. These assets are directly dedicated to investment in innovative DLT startups. All resulting annual profits will be distributed among the community through the **Community Profit Pool** and/or staked token. The **Multiverse Pool** will be treated in the first years as a long-term reserve pool to translate the community logic into a multiverse where DLT Hero Guilds can own property and interact with clients in a visual and playful way. The **Administration** and the **Coordinator Pools** will cover the community coordination and legal real-world costs. Assets from the **Auditor Pool** will cover expenses for internal quality audits and review activities. The **Emergency Pool** acts as constant reserve for unpredicted costs or events such as law suits, startup companies in financial troubles or similar.

FREELANCER LEVEL UP LIKE IN A GAME

DLT Hero Freelancer can level up within the ecosystem based on experience points they gain with real-world client projects. Since everything is based on Web3 and blockchain the wallet updates all related values such as experience points, level, ratings and so on automatically.

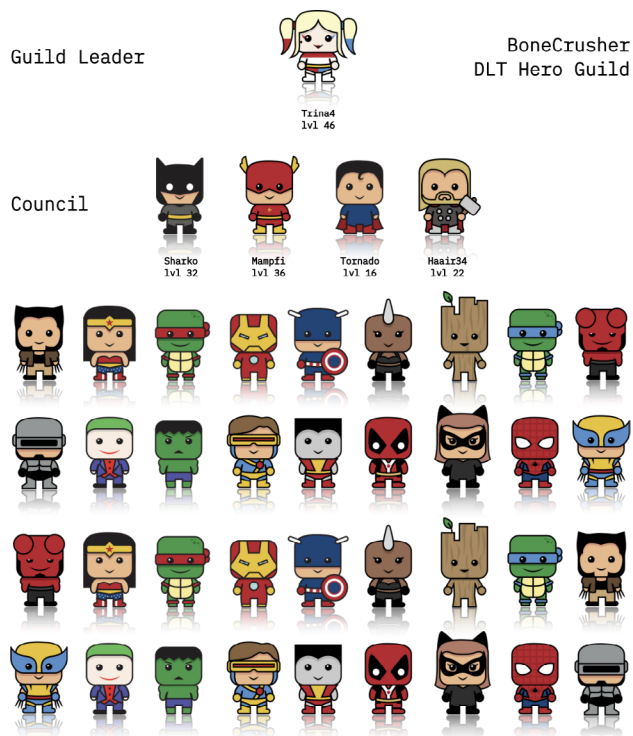

When freelancer reach level 100 they continue collecting experience points and can swap them against other community assets or trade them at our internal exchange.

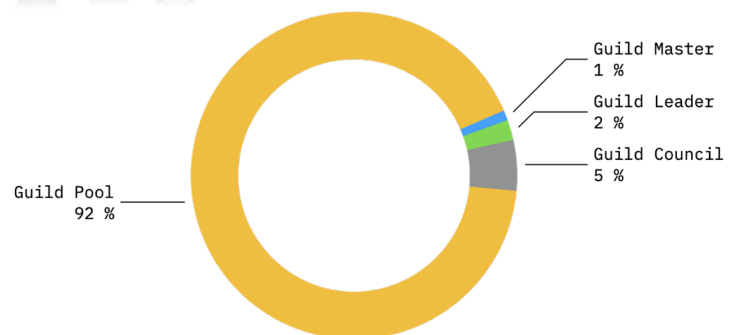

All performance stats of single freelancer sum up in their DLT Hero Guild. Therefore the performance of Guilds can be measured and compared to each other.

GUILD SYSTEM

To bring some fun and healthy competition into the community we decided to introduce a DLT Hero Guild System based on automated smart contracts and pool building. Every community member with an experience level higher than level 5 is entitled to found his or her own DLT Hero Guild. Guild Master, Guild Leader and Guild Council Member will receive a small amount from the Guild Pool (the exact values are decided by the Guild Master when he or she establishes the guild with the specific Guild Founding Smart Contract). Every Guild Member fulfilling a DLT Project contributes automatically a fee to the Guild Pool.

Every DLT HERO Guild can agree on their Guild Leader and Guild Council based on a Guild Voting System. Usage and allocation of the Guild Pool is subject to Guild Votings (e.g. reinvest in startups, cash out, stake,...).

PART 5
TOKEN GENERATION EVENT
TEAM

TEAM

The dHer0 token generation event team is a functional subteam of our DLT Hero Community.

Legally responsible for the ecosystem and all real-world LLC, Ltd, GmbH & AG performances:

Dr. Walter Kurz, MBA, MSc

- » **Function:** Founder, CEO, business ecosystem architect
- » **Qualification:** Studied business with focus on innovation, business models and change management; Supervisor MBA & DBA
- » **Experience:** Entrepreneur since 1997; DLT Hero is his third ecosystem.

Core team for token generation event **without** legal responsibility.

Oliver Bodemer, DBA, MBA

- » Function: Founder, CTO, Senior Developer

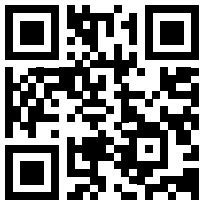

Katharina Brandenburg, DBA, MBA

- » Focus: Finance

Elias Beer

- » Focus: Sales
